Tipasa

https://www.oclc.org/en/tipasa.html

GOALS

- To make sure everyone is aware of what Tipasa can do now
- To make sure you think about how you use ILLiad and what features are important to your library
- OCLC is encouraging communication...so if/when you have a chance to talk to OCLC about Tipasa, you will have specific things you can bring up.

Who has attended a Product Insights: Resource Sharing webinar by OCLC?

Who attended the OCLC Resource Sharing Conference ~ Tipasa Tuesday ~

Important Dates

Join OCLC product management staff for a product insight gathering session on resource sharing. Product insight sessions are designed to gather community feedback on existing functionality and workflows, review new feature requirements, discuss new ideas for improving products, and maybe show-off a wireframe or two. These insight sessions are open for all community members to attend.

- ❏ February 21st (watch the recording)
- ❏ May 2nd (watch the recording)
- ❏ July 31st, 1-2pm

Recordings are posted on the website!

IDS libraries are Phase 3!

And, Phase 2 has just begun...

Why are IDS Project libraries Phase 3?

- No Logic for Tipasa
  - No automatic call number lookup
  - No auto cancel for items in collections you don't loan/loaned items
  - No automatic emails
- No ALIAS
- No Article Gateway
- Phase 1 libraries are still reporting things that they could do in ILLiad, but not in Tipasa...we need all functionality to maintain our high levels of service.
  - OCLC has some things on their roadmap...but not everything
    - Enhanced Article Exchange workflow
    - Purchase options: Reprints Desk, Amazon, GOBI, etc.
    - Additional search options: Serials Solutions (ProQuest 360 Core), EBSCO A-to-Z, HathiTrust, etc.
    - Branch workflows –moving requests from location to location or within different units of the library
    - Multiple authentication mechanisms
    - Continued user research including IDS libraries
    - Circulation integration
    - Lending request forms (requests coming from non-OCLC libraries)
    - **APIs (key for IDS)**
    - DOCLINE integration

Advisory Group - Phase 1

Jennifer Acker, Hudson Valley Community College

Tina Baich, IUPUI University Library

Margaret W. Ellingson, Emory University

Jade Erickson, St. Catherine University

John de La Fontaine, Occidental College

Megan Gaffney, University of Delaware

Brittany Heer, Univ of Colorado Health Sciences Library

Geneva Holliday, Univ of North Carolina at Chapel Hill

Teva Hutchinson, Atlanta Univ Center, Robert W. Woodruff Library

Holly Klump, Rivier University Regina Library

Aimee Lind, Getty Research Institute

Carrie Marten, Purchase College Library – SUNY

Meg Massey, Franklin & Marshall College

Dawn Mick, Iowa State University Parks Library

Kurt Munson, Northwestern University

Heidi Nance, University of Washington

Shannon Pritting, SUNY Poly

LeEtta Schmidt, University of South Florida

Hui Sheng, Westchester Library System

Kari Sime, Johnson County Library

IDS PROJECT

Advisory Group - Phase 2

Mikki Butcher, James Madison University

Nicole Colello, University at Buffalo Libraries

Amber Cook, University of South Carolina

Kate Enge, Juneau Public Libraries

Caitlin Finlay, Cornell University

Robyn Fleming, The Metropolitan Museum of Art

C. William Gee, East Carolina University

James B. Harper, Wake Forest University

Krista Higham, Millersville University

Sarah Kasten, University of Notre Dame

David H. Ketchum, University of Oregon Libraries

Carol Kochan, Utah State University

Micquel Little, Claremont Colleges

Megan Lounsberry, Louisiana State University

Kurt Munson, Northwestern University

Mareen O'Brien Dermott, Dickinson College

Melissa Perez, University of Texas at San Antonio

Renna Redd, Clemson University

Becky Schleicher, University of Northwestern-St. Paul

Liza Shcerff-Neskarikar, Princeton

Zehra Zamin, The Louisiana Library Network

Adding Non-OCLC request?

Do you enter requests into ILLiad for libraries that do not have an OCLC subscriptions?

We do and I wondered if this was possible in the new system or is available in WorldShare ILL? Answer: No, there is no way to do this in WS ILL now. Though it is on the roadmap for Tipasa. We have plans for 'lending pages' similar to what ILLiad provides to input requests from non-OCLC libraries.

Then they asked me:

1. Are you using the ILLiad lending pages or do you get all of these types of requests via e-mail?
2. Is the e-mail importing the bib data and creating the request for you or are you copy and pasting from the e-mail?
3. Once created – does it show up as just another lending request or do you have it in a separate queue?
4. Are you able to manually change the status of the request – say from submitted to shipped to received?
5. How many of these do you do in a typical month?
6. And do you have different loan policies/charges for this type of request vs. other OCLC lending requests?

Bottom Line

OCLC doesn't have a library and they don't use ILLiad. We, the Resource Sharing Community, need to be the driving force behind what Tipasa will become!
